

Size demo of the chorbars package S. Kramm

This is an size-demo, provided to be able to have a quick glance at what size choices can be done. It is build with the "article" class, using a default "12pt" font size and the "moresize" package ¹. See chordbar manual or source file for details.

Build on January 9, 2020.

1 - barsize=1.5

Font=large

C	Dm7	Em7	FΔ
----------	------------	------------	-----------------------------

Font=Large

C	Dm7	Em7	FΔ
----------	------------	------------	-----------------------------

Font=LARGE

C	Dm7	Em7	FΔ
----------	------------	------------	-----------------------------

2 - barsize=2

Font=LARGE

C	Dm7	Em7	FΔ
----------	------------	------------	-----------------------------

Font=huge

C	Dm7	Em7	FΔ
----------	------------	------------	-----------------------------

¹Without this additional package, and according to <https://www.sascha-frank.com/latex-font-size.html>, the \huge and \Huge are both 25pt (the same!) when using the "12pt" article option. This is not the case when using "11pt" font size.

Font=Huge

C	Dm7	Em7	FΔ
----------	------------	------------	-----------------------------

3 - barsize=2.5

Font=LARGE

C	Dm7	Em7	FΔ
----------	------------	------------	-----------------------------

Font=huge

C	Dm7	Em7	FΔ
----------	------------	------------	-----------------------------

Font=Huge

C	Dm7	Em7	FΔ
----------	------------	------------	-----------------------------

4 - barsize=3

Font=LARGE

C	Dm7	Em7	FΔ
----------	------------	------------	-----------------------------

Font=huge

C	Dm7	Em7	FΔ
----------	------------	------------	-----------------------------

Font=Huge

C	Dm7	Em7	FΔ
----------	------------	------------	-----------------------------

Font=HUGE

C	Dm7	Em7	FΔ
----------	------------	------------	-----------------------------
